

SHREYAS RANGDAL

Associate System Administrator | Flutter Developer | Cloud & DevOps Enthusiast

✉ shreyasrangdal@gmail.com | ☎ +91 9175915940 | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Results-driven IT professional with 1+ year of hands-on experience in Linux/Solaris system administration, automation scripting, and cloud infrastructure. Proven track record of maintaining zero-downtime production environments at Oracle. Skilled in Flutter mobile development, DevOps tooling (Docker, Jenkins, Kubernetes, Terraform), and cloud platforms (AWS, Azure). Holds multiple Oracle and Microsoft certifications. Passionate about delivering high-performance, scalable solutions.

TECHNICAL SKILLS

Languages	Python, Dart, JavaScript, Bash, C
Web Technologies	HTML5, CSS3
Frameworks	Flutter
Cloud Platforms	AWS (EC2, S3, Lambda), Microsoft Azure
DevOps & CI/CD	Jenkins, Docker, Kubernetes, GitHub Actions, Terraform
Databases	Firebase (Firestore, Realtime DB), MySQL
Operating Systems	Oracle Linux, Solaris, Ubuntu/Linux
Version Control	Git, GitHub
IDEs / Tools	IntelliJ IDEA, VS Code, Eclipse, Apache NetBeans, Cursor
Testing	Manual Testing, Postman

PROFESSIONAL EXPERIENCE

Associate System Administrator	Aug 2024 – Present
<i>Softenger India Pvt. Ltd. (Client: Oracle Pvt. Ltd.) Pune, Maharashtra</i>	
- Administered Oracle Linux and Solaris systems in enterprise production environments, ensuring 99.9% uptime. - Developed Bash/Python automation scripts for auto-generating system reports, reducing manual effort by ~40%. - Performed system troubleshooting, patch management, and performance optimization, achieving zero downtime during critical operations. - Monitored system health dashboards, proactively identified and resolved bottlenecks before escalation. - Collaborated with Oracle client teams to implement best practices for system stability and security compliance. - Patched and maintained servers including PDMOs, coordinating patch cycles to minimize risk and ensure compliance across production and non-production environments.	

INTERNSHIP EXPERIENCE

Team Lead & Front-End Developer	2024 (6 months)
<i>Inthink Technology 6-Month Internship 2024</i>	
- Led development of a women's safety & emergency alert mobile application using Flutter and Firebase. - Implemented real-time location tracking, SOS alert system, and emergency contact dialing features. - Designed a responsive, intuitive UI enabling sub-3-second access during emergency situations. - Ensured user privacy through secure Firebase Authentication and controlled data access permissions. - Tech Stack: Dart, Flutter, Firebase (Realtime DB, Notifications), HTML, CSS, JavaScript.	

Software Development Intern

2023 (7 weeks)

Persistent Systems – Persistent Martian Summer Internship Program 2023

- Completed structured training in **Linux OS**, **Java**, **Data Structures**, and **DBMS**.
- Gained hands-on experience with foundational programming and system administration concepts.

PROJECTS

Pet Buddy – Cross-Platform Pet Services App

Team Lead & Front-End Developer | Final Year Project | Tech: Flutter, Dart, Firebase (Auth, Firestore), JavaScript

- Built a **cross-platform mobile application** for pet daycare, adoption, and rescue services.
- Integrated **Firebase Authentication** and **Firestore** for secure login and real-time data management.
- Designed a user-friendly UI streamlining pet registration, daycare scheduling, and adoption workflows.

Udyog – Business Registration & Promotion App

Frontend & Backend Developer | Freelance | Tech: Flutter, Dart, Firebase (Firestore, Storage, Auth), HTML, CSS, JS

- Developed a mobile app enabling business owners to **register and promote their businesses** with category, location, and brochure details.
- Built an **admin panel** for reviewing and approving business listings with a streamlined onboarding workflow.
- Live project: bhavsarudyog.github.io

Home Automation Using Raspberry Pi

Python & Web Interface Developer | Third Year Mini Project | Tech: Python, HTML, CSS, Raspberry Pi, RPi.GPIO, Relay Circuit

- Developed Python scripts to control **Raspberry Pi GPIO pins** for real-time appliance automation.
- Built a responsive **web-based remote control interface** to manage home appliances over the internet.
- Implemented IoT architecture with Raspberry Pi, relay circuits, and Wi-Fi modules for seamless remote operation.

CERTIFICATIONS

- **Oracle Certified Professional** – Oracle Linux 8 System Administrator
- **Oracle Certified Associate** – Oracle Solaris 11 System Administrator
- **Oracle Cloud Infrastructure Foundations Certified** – Oracle (2025)
- **Microsoft Certified: Azure Fundamentals (AZ-900)**

EDUCATION

B.Tech – Computer Engineering

2024

Walchand Institute of Technology, Solapur University | CGPA: 8.24 / 10

Diploma – Computer Engineering

2017

S.E.S. Polytechnic, Solapur (MSBTE) | 82%
